

## WebICE Access Criteria

The provision of access to WebICE is intended to engender and foster liquidity on the Central Limit Order Book of the relevant ICE Exchange. All requests for WebICE access are considered in accordance with this overarching criterion.

The factors that ICE will take into account in determining whether to grant access to WebICE include, in particular, the following:

1. The type of entity or person requesting such access (e.g. if an Exchange Member, what type of Exchange Membership; if a trader, whether a physical or futures trader).
2. Whether the requested access is for trading purposes.
3. The applicable market interest (by reference to asset class e.g. interest rates).
4. Whether the grant of access to WebICE would be permitted under applicable jurisdictional requirements/approvals.
5. Whether there are (or will be) appropriate clearing arrangements in place at a relevant ICE Clearing House.
6. Whether the grant of access to WebICE would require, or have an impact on, any relevant third party licenses or permissions.

Ongoing WebICE access will be subject to review in line with the above factors, inclusive of any previously supplied information and the responsiveness of such persons to informational requests by ICE. WebICE access will also be considered in accordance with compliance with the applicable ICE Exchange regulations and terms of use. Any WebICE access or use that contravenes the rules, guidance and policies of the applicable ICE Exchange or the terms of use<sup>1</sup> as stated by ICE may result in such access being suspended or terminated.

ICE reserves the right to update this documentation at its sole discretion and without prior notice.
