

ICE NGX
Public Quantitative Disclosures Q2 2018

ICE NGX 2nd Quarter 2018

Overview:

This guide summarizes the CPMI-IOSCO public quantitative disclosure standards for central counterparties, and how ICE NGX has reported all the requested values. The table summarizes the below information:

- "Disclosure #" and "Disclosure Title" are taken from the public quantitative standards for central counterparties document
- "Disclosure Reference" breaks each "Disclosure #" into reportable values
- "Disclosure Description" provides further information in regards to each "Disclosure #"
- "Description Values" lists all relevant values used in the Data Files
- "Data Type" is the format of each value
- "Data File" specifies which CSV file the disclosure reference is reported in. Individual values are reported in the Aggregated Data File, and data arrays are reported in separate Data Files
- "Reporting Frequency" details the frequency of reporting i.e. Quarter End, Ad-hoc etc.
- "Comments" provide further clarification in regards to certain Disclosure References. Disclosure References shown as "NA" are not applicable to ICE NGX

Each Data File includes columns to define which level the Disclosure References are being reported at. The following apply for ICE NGX:

- "CCP" = ICE NGX

Data File naming convention is as follows:

Data Files:

[CCP]_DataFile_DisclosureNumber_YYYYQ#.csv

Example:

ICE NGX_DataFile_4_3_2018Q2.csv

Aggregated Data File:

[CCP]_AggregatedDataFile_YYYYQ#.csv

Example:

4.1	Total value of default resources (excluding initial and retained variation margin), split by clearing service if default funds are segregated by clearing service	4.1.9	Committed - Aggregate participant commitments to replenish the default fund to deal with a subsequent participant default (or round of participant defaults) after the initial participant default (or round of participant defaults) has been addressed; Reported as at quarter end		Text	AggregatedDataFile	Quarter end

4.2	Kccp	4.2.1	Kccp - Kccp need only be reported by those CCPs which are, or seek to be a "qualifying CCP" under relevant law		Numeric 2dp	AggregatedDataFile	Quarter end	ICE NGX is a CCP with a self funded default fund and does not require default fund contributions from its members; both the default fund contribution by clearing members and the associated capital costs of such contribution is currently zero. Basel III rules do not require QCCPs to be mutualized nor do they require QCCPs to have mutualized default funds. Given the certainty of the outcome of the capital cost calculation and the permissibility of ICE NGX's non-mutualized structure under the Basel III rules, ICE NGX has determined it satisfies the QCCP criteria without the Kccp value.

4.4	Credit Risk Disclosures	4.4.2	For each clearing service, state the number of business days within which the CCP assumes it will close out the default when calculating credit exposures that would potentially need to be covered by the default fund.		Numeric 0dp	AggregatedDataFile	Quarter end	Close out procedures are outlined in Section 5.6 and 8.3 of the Contracting Party Agreement ("CPA") and ICE NGX would follow those procedures. ICE NGX's direct cleared, non-mutualized structure means that non-defaulting Contracting Parties are not exposed to losses by the defaulting Contracting Party, nor does ICE NGX have the ability to directly transfer (port) positions to non-defaulting Contracting Parties without prior consent. Accordingly, ICE NGX tests procedures by conducting regular liquidation simulation events without participation by Contracting Parties.
