

ICE Indices

U.S. Treasury Short Bond Index (IDCOTS)

The ICE U.S. Treasury Short Bond Index is part of a series of indices intended to assess U.S. Treasury market. The Index is market value weighted, and is designed to include U.S. dollar denominated, fixed rate securities with minimum term to maturity greater than one month and less than or equal to one year. The ICE U.S. Treasury Bond Index Series™ has an inception date of December 31, 2015. Index history is available back to December 31, 2005.

INDEX ELIGIBILITY AND INCLUSION RULES

Rules for Inclusion:

Size	USD \$300 million minimum par amount outstanding. U.S. Treasuries included in the Federal Reserve System Open Market Account (SOMA) will be deducted from the bond amount outstanding. Amount Outstanding is defined as the par amount outstanding of each Treasury, inclusive of any announced auctions or re-openings, less the par amount of said Treasury held in the Federal Reserve System Open Market Account (SOMA) or bought at issuance by the Federal Reserve. New issuance bought at auction by the Federal Reserve is not included in the Eligible Bond universe (Index). Secondary market purchases by the Federal Reserve that occur in the current month are not reflected in the Index until the following month.
Maturity	All eligible securities must have a minimum term to maturity greater than one month and less than or equal to one year at the rebalancing date.
Coupon	Fixed Rate only excluding zero-coupon STRIPS.
Currency	Denominated in USD.
Security Types	U.S. Treasury issued debt with the following excluded: Inflation-linked securities, Floating Rate Notes, Cash Management Bills, and any government agency debt issued with or without a government guarantee.

Rebalancing Rules:

Frequency	The composition of the index is rebalanced at each month-end. A pro-forma index will be available starting three days before month end and is intended to reflect the Constituent changes from the prior rebalancing date based on Index eligibility.
Index Maintenance	The Index is not adjusted for securities that become eligible or ineligible for inclusion during the month. Any such changes are incorporated in the new Index, which is published on the third Business Day prior to the end of the month, and made effective from the first day of the following month.

Reinvestment of Cash Flows	Cash that has accrued intra-month from interest and principal payments by the Index earns no reinvestment return during the month. Accumulated cash (from coupon and principal payments) is removed from the index at month-end, which implies that it is reinvested pro rata across the entire Index.
New Issues	Qualifying securities auctioned on or before the month-end rebalancing date may qualify for inclusion. When issued Treasuries are included in the pro forma Index with a price of \$100 until replaced with an evaluated price as soon as available after auction day.

Pricing and Reference Data:

Timing	3:00 pm ET snapshot each day. If the last business day of the month falls on a weekend or a public holiday in the U.S. market, prices from the previous business day are used. Return calculations are computed through the end of the calendar month with next day settlement. Target latest delivery time for End of Day files is by 6:00pm ET. Where the bond market closes early per the SIFMA schedule, Index levels may be calculated at a time in accordance with the recommended close. However, evaluated pricing from Interactive Data must be available to calculate the Indices.
Bid Prices	Bonds in the index are priced on the bid side.
Settlement Assumption	ICE Indices use the standard market convention available through the Evaluated Pricing Team (EVP).

Please refer to the [ICE U.S. Treasury Bond Index Series Methodology](#) document for additional information.
