

ICE DATA INDICES RULES AND METHODOLOGY

ICE® U.S. 200 Index

The ICE® U.S. 200 Index is a rules-based, float-adjusted market capitalization-weighted broad U.S. equity index that has the objective of measuring the performance of the top 200 listed U.S. companies as ranked by unadjusted market capitalization.

The Index undergoes a full reconstitution involving a selection of constituents based on rank and float-adjusted shares outstanding updates semi-annually after the close of the third Friday of March and September. The universe from which Index constituents are selected is comprised of all companies that are listed on U.S. stock exchanges and have a U.S. country of risk. To be included in the index companies must have an unadjusted company-level market capitalization, including all listed and unlisted share classes, of at least \$10 million, a price greater than \$1.00 but less than \$10,000.00 and a free float of at least 5%. IPOs and new listings have a six-month seasoning period before being considered for inclusion. The following security types do not qualify for inclusion: Limited Partnerships (LPs), Master Limited Partnerships (MLPs), Limited Liability Partnerships (LLPs), Limited Liability Corporations (LLCs), Business Development Companies (BDCs), Special Purpose Acquisition Companies (SPACs), Closed-End Funds (CEFs), Exchange Traded Products (ETPs), Royalty Trusts, Preferred Stocks, Convertible Preferred Stocks, Unit Investment Trusts (UITs), Equity Warrants, Convertible Bonds, Rights Issues, American Depository Receipts (ADRs), American Depository Shares (ADS), Equity Investment Instruments and Non-Equity Investment Instruments. Qualifying companies are ranked by unadjusted market capitalization and the largest 200 are selected for inclusion. If a company has multiple listed share classes that qualify, then they will all be included in the Index at their respective float-adjusted security-level market capitalization weighting.

The Index undergoes a rebalance involving the addition of seasoned and qualified IPOs and new listings and float-adjusted shares outstanding updates for all constituents semi-annually after the close of the third Friday of June and December. The reference date for all reconstitutions and rebalances is the close of the last trading day of the month preceding the month of rebalance/reconstitution effectiveness. At each semi-annual rebalance the existing constituents in the Index will have their float-adjusted shares outstanding updated. IPOs and other new listings such as spin-offs that have qualified for inclusion based on the seasoning and minimum criteria rules above will be added to the Index if they have an unadjusted market capitalization that fall within the top 200 companies based on rankings determined using current data as if a full reconstitution were taking place.

The Index is adjusted for corporate actions that affect constituents, and implements any intra-quarter float-adjusted shares outstanding updates in scheduled weekly share updates. Every quarter after the close of trading on the third Friday of March, June, September and December, the Index constituent security-level shares outstanding and float factors are adjusted to reflect their respective float-adjusted market capitalizations.

Index Summary Factsheet

Full name	ICE® U.S. 200 Index
Index tickers	Price Return Index: ICEUST2 Gross Total Return Index: ICEUST2T
