ICE ENDEX - INCENTIVE SCHEMES

ICE Endex operates a number of Incentive Schemes as set out in article II-6 of the ICE Endex rulebook. The objective of the ICE Endex Incentive Schemes is to support the fair and orderly operation of its markets, ensuring liquidity and solid price formation.

In case an Incentive Scheme applies to a particular company, ICE Endex will offer fee-incentives on its standard transaction fees in return for meeting the Scheme's requirements. Eligibility for fee-incentives can be subject to trading certain minimum volumes, and/or meeting quoting requirements.

The design of specific Incentive Schemes will take the characteristics of each individual market into account. The selection of companies that participate in Incentive Schemes is based on objective criteria and parties participating in a specific Scheme will be treated equally.

The performance of individual participants in the incentive-based programmes is reviewed on a regular basis and looks at whether the participants have fulfilled their obligations under their respective Schemes. A failure by a particular company to meet its obligations will mean that it will not receive a fee-incentive over a given time-span, normally a calendar month; in case of structural non-performance it could lead to termination.
