

ICE FUTURES EUROPE

# BIOFUELS FUTURES

ICE Future Europe is recognised by the global trading community as the go-to Exchange and Clearing House for managing risk in an evolving marketplace.

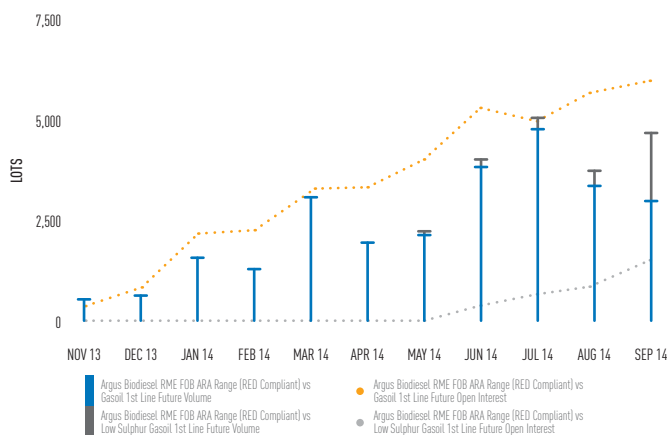

In November 2013, ICE expanded its biodiesel suite of cleared products, joining hundreds of energy commodity derivatives contracts, which can be traded on screen as well as via brokers.

Utilising the in-house clearing platform, ICE manages market participants' cross margin requirements and performance risks in one location.

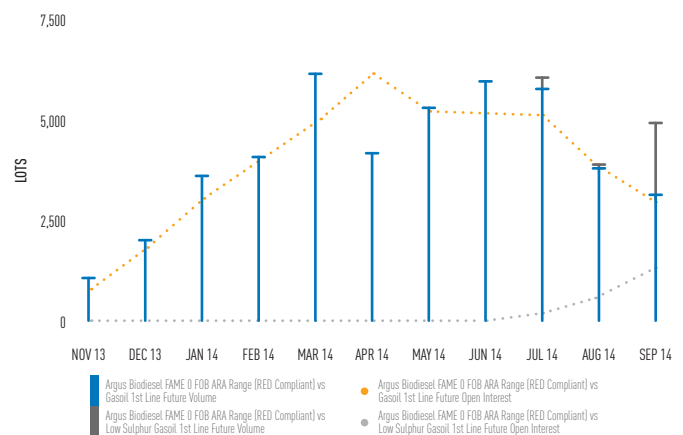

ICE is home to many middle distillate and agricultural markets and provides market users with liquidity in numerous hedging tools for the maturing biodiesel and bioethanol markets.

CONTRACT NAME	ICE CODE	LOT SIZE	SCREEN FEE (PER LOT)	BLOCK FEE (PER LOT)	ICE CLEAR EU CASH SETTLE
