ICE Futures U.S.®

NOTICE

MARGIN RATES UPDATE FOR ICE FUTURES U.S. OIL CONTRACTS

The Exchange is changing the margin requirements for the Energy Contracts listed below effective from the close of business on **Thursday, October 7, 2021** and reflected in margin calls made on **Friday, October 8, 2021**. Accordingly, Firms carrying accounts with positions in the following contracts should be collecting margin using the updated ICE® Risk Model margin parameters:

- ICE Futures US Oil Contracts

The updated ICE Risk Model margin parameters can be found at:

https://www.theice.com/clear-europe/risk-management#margins-europe

All other ICE Risk Model margin parameters remain unchanged.

For each of the IFUS Energy Contracts, ICE Clear Europe ("ICEU") determines the margin rate that is charged to clearing members that carry positions in these contracts. The Exchange minimum margin requirements for outright and straddle positions are based upon the ICEU margin rate charged to clearing members, as follows:

For all accounts, clearing members are required to identify categories of customers with heightened risk profiles and collect initial margin for each account at a level that exceeds the specified clearing original margin requirement by an amount commensurate with the risk presented by each such account. Exchange Carrying Firms are required to collect initial margin on this same basis.

For all accounts, the Exchange minimum Maintenance Margin is equal to the ICEU Margin rate for each respective IFUS Energy Contract.
