

ICE Clear U.S.
Public Quantitative Disclosures Q2 2018

ICUS_F&O 2nd Quarter 2018

Overview:

This guide summarizes the CPMI-HOSCO public quantitative disclosure standards for central counterparties, and how ICE Clear U.S. has reported all the requested values. The table summarizes the below information:

- **"Disclosure #"** and **"Disclosure Title"** are taken from the public quantitative standards for central counterparties document
- **"Disclosure Reference"** breaks each "Disclosure #" into reportable values
- **"Disclosure Description"** provides further information in regards to each "Disclosure #"
- **"Description Values"** lists all relevant values used in the Data Files
- **"Data Type"** is the format of each value
- **"Data File"** specifies which CSV file the disclosure reference is reported in. Individual values are reported in the Aggregated Data File, and data arrays are reported in separate Data Files
- **"Reporting Frequency"** details the frequency of reporting i.e. Quarter End, Ad-hoc etc.
- **"Comments"** provide further clarification in regards to certain Disclosure References. Disclosure References shown as "N/A to ICUS" are not applicable to ICE Clear U.S.

Each Data File includes columns to define which level the Disclosure References are being reported at. The following apply for ICE Clear U.S.:

- **"CCP"** = ICUS
- **"Default Fund"** = ICUS
- **"Clearing Service"** = null (ICUS reports provides one clearing service, therefore all Disclosure References are reported at the Default Fund level)

Overall Comments:

1. Currency values are USD equivalent unless otherwise indicated
2. Post Haircut values are expressed in USD

Data File naming convention is as follows:

Data Files: [CCP]_DataFile_DisclosureNumber_YYYYQ#.csv

Example:

ICUS_DataFile_4_3_2018Q2.csv

Aggregated Data File: [CCP]_AggregatedDataFile_YYYYQ#.csv

Example:

ICUS_AggregatedDataFile_2018Q2.csv

ICE clearing systems encompass a number of integrated systems, most importantly, the Extensible Clearing System, or ECS, and the Post-Trade Management System, or PTMS, and Allocation and Claim Transaction (ACT) system.</p> <p><u>Extensible Clearing System (ECS)</u> - Internet-based ECS is the core clearing system. ECS supports open position and delivery position management, real-time trade and post-trade accounting, risk management (daily and intra-day cash, mark-to-market, option premium, and original margin using the CME SPAN algorithm), collateral management, daily settlement and banking. ECS also has a reporting system that delivers online access to daily and historical reports in multiple formats, as well as a currency delivery system to manage the delivery and payment of currency settlements.</p> <p><u>Post Trade Management System (PTMS)</u> - PTMS is the primary application for post-trade management. The system provides real-time trade processing services enabling clearing members to offer real-time risk management services. ICE Clear U.S. offers real-time confirmation of trades booked for clearing using a standard FIXML formatted API and supports post-trade management functions including trade corrections, trade adjustments, position transfers, average pricing and give-up processing.</p>

								<p><u>Allocation and Claim Transaction (ACT) System</u> - Trades marked for give-up in PTMS are sent to ACT. Using ACT, a clearing member can initiate allocations (give-outs) to multiple clearing members and monitor the status of those allocations as well as the status of give-ins from other firms. ACT also allows a clearing member to define profiles to automate the allocation and claiming of trade activity. Give-up transactions (from and to) are recorded in the clearing system and reflected on the clearing member's clearing records. Information about the give-up transactions is also sent to the eGains system, an automated billing system licensed and supported by the FIA Tech affiliate of the Futures Industry Association (FIA).</p> <p><u>For Receiving Trade Messages</u> <u>MQ/FixML Messaging</u> - A clearing member typically receives trade messages during the trading day to load into internal bookkeeping and risk systems. ICE Clear U.S. uses the industry standard FixML trade confirmation messages sent over MQ channels set up with the clearing member.</p> <p><u>For Connectivity</u> <u>Managed File Transfer (MFT)</u> - The ICE Clear U.S. MFT service is a member interface that provides access to key reports and data published by the clearing house. It is also the service that a clearing firm uses to send important data, including regulatory reports and position change (PCS) and gross customer margin (GCM) submissions, to the clearing house.</p>
