

## LONDON NOTICE NO. 3767

Issue Date: 25 November 2013

Effective Date: 2 December 2013

### EQUITY INDEX CONTRACTS (EXCHANGE CONTRACT NO. 301)

#### INTRODUCTION OF THE MSCI WORLD NET TOTAL RETURN INDEX FUTURES CONTRACT ON THE UNIVERSAL TRADING PLATFORM AND AMENDMENTS TO THE CONTRACT SPECIFICATIONS

##### Executive Summary

This Notice informs Members that the MSCI World Net Total Return Index Contract, which is currently available via Bclear only, will also be made available for trading on the Universal Trading Platform on and from 2 December 2013, and be subject to certain contract specification amendments on and from that date.

#### 1. Introduction

- 1.1 This Notice informs Members that the MSCI World Net Total Return (NTR) Index Contract (exchange code MCN) ("the Contract"), currently available for reporting to the Exchange via Bclear only, will also be made available for trading on the Universal Trading Platform (the "UTP") on and from 2 December 2013.
- 1.2 In addition, certain amendments will be made to the existing contract specifications, effective on and from 2 December 2013.
- 1.3 This Notice provides Members with the following information:
  - (a) background;
  - (b) changes to the existing Contract specifications and Contract Terms;
  - (c) trading licences, Bclear access and Bclear reporting rights;
  - (d) Block Trade minimum volume threshold;
  - (e) Bclear minimum volume requirements;
  - (f) business days, trading hours and reporting hours;
  - (g) fees;
  - (h) market making arrangements;
  - (i) statement in relation to the Contract; and
  - (j) regulatory position in the United States.

The **Euronext Derivatives Markets** comprise the markets for derivatives operated by Euronext Amsterdam, Euronext Brussels, Euronext Lisbon, Euronext Paris and LIFFE Administration and Management, referred to respectively as the Amsterdam, Brussels, Lisbon, Paris and London markets. Euronext is part of the NYSE Euronext group.

## **2. Background**

- 2.1 Since introducing the Contract on Bclear in March 2009 (London Notice No. [3134](#), issued on 17 March 2009 refers), the Contract has proved to be one of the most successful of the MSCI Futures franchise. The Exchange has now determined to make this MSCI Futures contract available on UTP, on and from 2 December 2013.
- 2.2 As with other contracts available on both the UTP and Bclear, the Contract will be fully fungible across the two platforms.

## **3. Changes to the existing Contract Specifications and Contract Terms**

- 3.1 The following amendments will be made to the Contract on and from 2 December 2013:
- (a) a reduction in the number of delivery months available for trading at any one time such that five quarterly delivery months will always be available. From 2 December 2013, the following delivery months will be available: December '13, March '14, June '14, September '14 and December '14;
  - (b) the Trading Tick Size will be increased from 0.001 to 1, for a tick value of \$10;
  - (c) the standard UTP Daily Settlement Price ("DSP") process will be used to establish the DSP at 16:30 hours (London time). For the avoidance of doubt, the same DSP will be used to settle the Contract in Bclear;
  - (d) the Contract will be available for trading on UTP from 01:00 to 21:00 hours (London time), and trading on the Last Trading Day extended to 16:30 hours (London time); and
  - (e) the minimum volume requirement for Block Trades and the minimum reporting volume in Bclear will be set at 50 lots.
- 3.2 The contract specification amendments are set out in Attachment 1 to this Notice.
- 3.3 Exchange Contract No. 301 will be amended in order to reflect the changes described above and the amendments to the List of Contract Details for this Contract are set out in Attachment 2 to this Notice. An updated version of Exchange Contract No. 301 will be made available on the NYSE Euronext website ([www.nyx.com/liffe](http://www.nyx.com/liffe)) in due course.

## **4. Trading licences, Bclear Access and Bclear Reporting Rights**

- 4.1 Members wishing to execute trades in this Contract in UTP or to submit trades in the Contract via Bclear must hold a valid London market Futures trading subscription (FUT).
- 4.2 Direct access to Bclear is available to Members of the London market, including those affiliates of Members who have been approved by the Exchange pursuant to Rule 3401 (Rules, Book I). Other wholesale market participants who are clients of Members may have indirect access to Bclear on an intermediated basis via such Members. Members will be required to perform appropriate risk management checks in relation to all client business before it is subjected to the Exchange's trade confirmation process.

4.3 To claim trades only in the Contract, Members will need to have the appropriate entitlement set up in the membership database and access to the Universal Clearing Platform ("UCP").

4.4 To clear trades in the Contract, Members will require the relevant clearing status (GCM or ICM) and access to UCP.

## **5. Block Trade minimum volume threshold**

5.1 The Contract will be included in the Exchange's Block Trade Facility. The minimum volume threshold will be 50 lots. Members are reminded that the minimum volume threshold applies to each leg of a strategy trade.

5.2 An updated list of Block Trade minimum volume thresholds will be made available on the NYSE Euronext website ([www.nyx.com/liffe](http://www.nyx.com/liffe)) in due course.

## **6. Bclear minimum volume requirements**

6.1 The minimum volume requirement for the Contract reported via Bclear will be 50 lots.

## **7. Business days, trading hours and Last Trading Day**

7.1 The Contract will normally be available for trading Monday to Friday. Certain non-trading days for 2013 and 2014 are set out in Attachment 3 to this Notice.

7.2 Detailed session times for the trading of the Contract on the UTP are as follows (all times are London time):

Session Start	Pre-Open	Open	Settlement	Pre-Close	Close	Session Close
00:30	00:45	01:00	16:30	20:58	21:00	22:00

7.3 Members will note that the UTP trading hours extend the availability of the Contract outside normal business hours for a European Index Future. As a consequence, Members may expect liquidity during the extended trading hours to be at a lower level than may be the case during the more standard London trading hours for the Contract.

7.4 Orders identified as "Good 'Til Cancelled" will be active from the commencement of trading at 01:00 hours, unless amended. Members should consider the impact of likely liquidity conditions on such orders where they are maintained in the market during the extended trading hours and make any amendments to the characteristics of those orders as they deem appropriate.

7.5 Members may report transactions in the Contract to the Exchange via Bclear between 08:00 and 17:30 hours (London time), except on the Last Trading Day when transactions may be reported to the Exchange via Bclear between 08:00 and 16:30 hours (London time).

7.6 The reporting arrangements explained in Section 12 of Book II of the Rules and section 7 of this Notice will, of necessity, determine the days and hours during which the relevant transactions may be undertaken.

- 7.7 The Last Trading Day for the Contract shall normally be the third Friday of the delivery month. However, Members should refer to Term 4 in Exchange Contract No. 301 on the NYSE Euronext website ([www.nyx.com/liffe](http://www.nyx.com/liffe)) and the definition of “business day” in Term 1 which have the following effect in respect of the Last Trading Day: for the Contract, the Last Trading Day will not ordinarily be moved unless all of the relevant stock exchanges are closed for business, subject to Term 4.03.

## **8. Fees**

- 8.1 Transaction fees will be charged on a per lot, per side basis:
- (a) on UTP, trading fees will be set at £0.47; and
  - (b) for transactions reported via Bclear, trading fees for published trades will be set at £0.47 and, for non-published trades, at £0.57.
- 8.2 Clearing fees will also be charged on a per lot, per side basis and will be set at £0.05.

## **9. Market Making Arrangements**

- 9.1 A Primary Market Maker Programme (“PMM Programme”) will be available for the Contract in UTP. For details of the PMM Programme, Members should refer to London Info-Flash No. LO13/88, also being issued today.

## **10. Statement in relation to the Contract**

- 10.1 The Exchange draws the following statement to the attention of potential users of the Contract. Members should ensure that their clients are made aware of the statement.

### *“Statement in relation to the Contract*

Potential users of the Equity Index Contracts made available on the London International Financial Futures and Options Exchange should familiarise themselves with the relevant Index rules, construction, calculation and dissemination procedures (together the “Index rules and procedures”) and these contract terms. The various indices underlying the Equity Index Contracts made available under this Exchange Contract No. 301 are calculated and managed by a number of different index providers, each of whom has its own Index rules and procedures. Furthermore, Index construction methodologies vary from Index to Index. Therefore, potential users should ensure that they familiarise themselves with all relevant Index rules and procedures for the specific Equity Index Contracts they intend to use.

Certain Equity Index Contracts may be available for trading for periods of the trading day when one or more (or all) of the relevant underlying stock exchanges are closed. Potential users should consider for themselves, or take advice in relation to, the risks of trading those Contracts while any of the underlying stock exchanges are closed.

Price formation leading to the EDSP for the Equity Index Contracts is subject to similar influences to those in the case of many other cash-settled contracts. Trading activity on the relevant stock market(s) during the EDSP Period is likely to be affected by the activity of particular market participants who are seeking to obtain price convergence at the EDSP between offsetting stock and futures positions. Such participants might typically seek to achieve this by unwinding their stock positions during the EDSP Period at prices which they anticipate will contribute to the calculation of the Index figure(s) which will, in turn, be used to determine the final EDSP. A consequence of this concentrated activity might be that:

- (a) (with the exception of the Contracts on the MSCI Net Total Return Indices and the MSCI KOKUSAI Gross Total Return Index, in relation to which official Index figures are calculated on a daily basis only), the final EDSP differs from the Index figure immediately prior to the commencement of the EDSP Period and, if relevant, from the Index figure immediately following that period; or
- (b) for the Bclear MSCI Net Total Return Index Contracts and the Bclear MSCI KOKUSAI Gross Total Return Index Contract only, the Index figure used to calculate the final EDSP differs from the Index level(s) implicit (since the Index is not calculated on a realtime basis) from the prices of relevant stocks during the immediately preceding period.

Potential users should, therefore, consider the risks of holding positions into the expiry of the Equity Index Contracts. In particular, they should consider their exposure to potentially unfavourable price movements in the expiry and whether to take steps to neutralise such exposure; for example, taking into account that there may be relatively limited liquidity provision, whether to “roll” or close positions prior to expiry.

Potential users should also be aware that, in respect of Equity Index Contracts based on Indices for which there is more than one relevant stock exchange, a “market day” will ordinarily be capable of being designated as a “business day”, and therefore as a “Last Trading Day”, unless all relevant stock exchanges are closed for business.

Where the Last Trading Day occurs on a day where one or more of the relevant stock exchanges is closed for business, the EDSP will necessarily be derived from Index figure(s) containing some constituent stock prices which were determined on the most recent previous day on which each such stock exchange was open for business. In such circumstances, potential users should be aware that, as a consequence, the constituent stock prices contributing to the Index figure(s) used to calculate the EDSP will not all have been determined on the same day. Potential users should be aware that, in such circumstances, although some constituent stocks will not be available for trading on the Last Trading Day of the Contract, the prices of those constituent stocks as included in the Index calculation may, as a result of movements in foreign exchange rates, still be subject to change which would be reflected in the EDSP in accordance with the relevant Index compilation and calculation procedures.”

**11. U.S. Regulatory Position**

11.1 Members should note that U.S. Persons are not currently permitted to engage in transactions in the Contract. The Exchange will advise Members should such permission be granted.
